Cristian L. Cruz

(678) 209-6999 | cristianluke2k@gmail.com | Clearfield, UT | LinkedIn | GitHub

Data Engineer with 1+ year building production ETL pipelines processing 50M+ records monthly. Specialized in automating data workflows using Python, SQL, and cloud platforms that eliminate manual processes. Delivered 50+ BI dashboards tracking $100M+ in revenue for 100+ daily users across 20+ client engagements.

EDUCATION

Brigham Young University – Marriott School of Business | Provo, UT
Bachelor of Science in Information Systems | GPA 3.7/4.0 | Sep 2019 – Aug 2025

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, C#, PHP, Bash
Data Engineering: ETL/ELT Pipelines, Data Warehousing, Data Modeling, API Integration
Analytics & BI: Tableau, MetaBase, Domo, Amazon QuickSight
Cloud: AWS(EC2, ECR, ECS, CloudWatch), GCP (BigQuery, Compute Engine), Snowflake
Tools & Frameworks: Git, REST APIs, Postman, Docker, CI/CD, Django, Node.js
Python Libraries: Pandas, NumPy, PyTorch, scikit-learn, Matplotlib

PROFESSIONAL EXPERIENCE

Product Engineer | LeaderFactor | Lehi, UT | Aug 2026 – Present

- Direct coding agents to build and maintain the product in TypeScript and Node.js, and decide what gets built – how features look and feel, who gets access, and where they live
- Scope work into small, reviewable PRs and scrutinize agent-written code and migrations before they touch production data, cutting each change to the smallest version that works

Technical Consultant | ClearSquare | Orem, UT | Apr 2025 – Aug 2026

- Built 15 production ETL pipelines processing 50M+ records monthly across client databases, replacing manual CSV uploads and spreadsheet-based workflows
- Automated daily data ingestion from 25+ sources (APIs, CSVs, databases) using Python and SQL, eliminating manual file transfers and data uploads
- Delivered 50+ custom dashboards in Domo, MetaBase, and QuickSight that monitor $100M+ in client revenue, used daily by 100+ stakeholders for strategic planning

Web Developer | BYU Police & Security | Provo, UT | Apr 2024 – Apr 2025

- Architected RESTful API with 40+ endpoints using ASP.NET, reducing data retrieval time by 70% for internal security systems
- Wrote 200+ unit tests with Jest covering SQL queries and API logic, achieving 95% code coverage and eliminating production bugs for 6 months

Research Assistant | Dr. Mark Keith | Provo, UT | Dec 2024 – May 2025

- Built Python ETL pipeline using Serpapi to extract and normalize 10,000+ web-scraped records into structured datasets, accelerating research timelines by 3 weeks
- Engineered text processing pipeline using Python and OpenAI API to extract structured keywords from unstructured data, saving 40 hours of manual effort

PROJECTS

Housing Price Prediction Model | Python, PyTorch, scikit-learn | 2025
Trained ML regression model on 15,000 Utah housing records achieving 89% prediction accuracy; implemented feature engineering that improved RMSE by 18%

Scripture Semantic Search Engine | Python, Transformers, Streamlit | 2025
Deployed NLP search app using sentence-transformers on 40,000+ verses; achieved sub-200ms query response time with Hugging Face model hosting

ADDITIONAL

Languages: Fluent in Spanish
Leadership: Eagle Scout – Coordinated 20 volunteers over 80 hours to restore flood-damaged community park
